The millions of Californians that are OSV and OHV enthusiasts strongly oppose any additional action by the National Forest Service to control and restrict access to public lands.

We know how this works, millions of tax payer dollars are spent to determine that a dirt road needs to be closed for no valid reason. You start by doing an EIS of the area, then some "restoration" of the land which simply employs some environmentalists partners of the FS. Next step is that the analysis defines that ATV, UTV and dirt bike riding on these roads is destroying the habitat. Next the roads are closed.

The Forest Service needs to be building more roads for riding, not closing them.

Those would want to stop public access restrictions are aware of the Forest Service plans to restrict the forest access. We are now organized, well funded and prepared to stop all or reverse all actions which resemble the current travel management plan or similar action.
