Comments

1. What ever rules you impose on the general public are enforced. If you can't enforce the rules due to budget constraints or other constraints, then don't make new rules.
2. Whatever rules you make should be applied to all users of that area. For example, I know of some ranchers who are allowed to ride ATVs all over areas that the general public can't because they have grazing leases inside National Forests.
3. I would like more roads for specific user types set up -motorcycle, ATVs, 4 wheel drive trucks, etc. based on vehicle width.
4. I disagree with closing down existing roads. These roads were needed for a purpose.
5. I do agree with closing unlimited off road vehicle travel and that vehicles should follow trails or roads.
