Dear USDA,

I would like to express the importance of Section 219.8 of the proposed EIS.

As an avid outdoors person I am a firm believer in the need for a balance of recreational activities including motorized and non-motorized uses. I understand that some areas are just not conducive to certain activities, however I have seen far too many areas closed to recreational use without new areas being opened or defined. I feel with proper land management and public support in both the decision making process and physical upkeep we can provide both motorized and non-motorized activity areas for many generations to come.
