## Comments

We are sick to death of you damned uncivil dis-servants making the bureaucracy even larger, employing even more useless people, to continue to unlawfully restrict our GOD-given rights guaranteed by the U.S. Constitution. We are working diligently to begin ridding ourselves of this present form of government that has become tyrannical over the citizens of this republic. The future will find "we the people" re-instituting the edicts of the U.S. Constitution, and most of you useless, God-less un-civil dis-servants will find yourselves out of a job and in the poor house (where your actions have already forced many others). In your arrogance, you will ignore our message, but mark this: judgment is coming for the unrighteousness you have forced upon your "neighbor." Repent and pursue God's righteousness - before it is too late.
