Comments

The new rules regarding fish and wildlife and our natural areas are of the utmost importance.

Please, please, we need the maximum possible protection for our streams, rivers, grasslands, fields and wild areas

Do not let these important new rules reflect the famous compromises the Obama administration so often makes.

We either are committed to saving these areas and the creatures in them, or we are not. I urge you to insist on protection of our national and human heritage.

Sincerely,

Nancy Twiss
